Project Title: Yang Yoseop Website

I am going to create a website with multiple pages. As other multipaged websites have, there will be a link button to navigate across pages within a left sidebar on the page. There are many sources with information about this artist, and I, myself, am familiar with the artist, so there will be much to draw from.

- **Home page/introduction:** Introduces basic career and life of Yang Yoseop, a Korean singer, and a main vocalist within K-pop boy group named Highlight (former group name-Beast). I will emphasize most famous songs that were sung by this artist.
- **Early life:** his preparation years before making debut as singer (K-pop artist)
- **Career:** Professional career as K-pop artist, his famous songs, work as solo, other areas where he has made an impact or has taken part in.
- **Group History:** History of the K-pop group Highlight(Beast) Yang Yoseop was in, the struggles with its entertainment company and how they came about to creating their own entertainment company
- **Sources:** will include any pages that were used to gather information and images. Plus any other credits that need to be provided.
